

Pareto Securities Healthcare Conference

September 1st, 2021

Anna Ljung, CEO

Disclaimer

The purpose of this presentation (the "**Presentation**") is to provide an overview of Moberg Pharma AB (publ) (the "**Company**"). For the purposes of this notice, "Presentation" means this document, its contents or any part of it, any oral presentation, any question or answer session and any written or oral material discussed or distributed during the Presentation meeting.

This Presentation is not a prospectus or similar offer document. This Presentation does not purport to contain comprehensive or complete information about the Company and is qualified in its entirety by the business, financial and other information the Company is required to publish in accordance with the rules, regulations and practices applicable to companies listed on Nasdaq Stockholm (the "**Exchange Information**"). Any decision to invest in any securities of the Company should only be made on the basis of a thorough examination of the Exchange Information and an independent investigation of the Company itself and not on the basis of this Presentation. Neither this Presentation nor any of the Exchange Information has been independently verified by any other person unless expressly stated therein. No representation or warranty, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy or completeness of the information or opinions contained in this Presentation.

Except where otherwise indicated in this Presentation, the information provided herein is based on matters as they exist at the date of preparation of this Presentation and not as of any future date. All information presented or contained and any opinions expressed in this Presentation are subject to change without notice. None of the Company or any of its directors, officers, employees, agents, affiliates or advisers is under any obligation to update, complete, revise or keep current the information contained in this Presentation to which it relates or to provide the recipient of with access to any additional information that may arise in connection with it.

This Presentation contains "forward-looking" statements. These forward-looking statements can be identified by the fact that they do not relate only to historical or current facts. In particular, forward-looking statements include all statements that express forecasts, expectations, plans, outlook and projections with respect to future matters, including trends in results of operations, margins, growth rates, overall market trends, the impact of interest or exchange rates, the availability or cost of financing, anticipated cost savings or synergies, the completion of strategic transactions and restructuring programmes, anticipated tax rates, expected cash payments, and general economic conditions. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future and they are subject to change at any time. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements, including risks associated with the inherent uncertainty of pharmaceutical research and product development, manufacturing and commercialization, the impact of competitive products, patents, legal challenges, government regulation and approval, the Company's ability to secure new products for commercialization and/or development and other risks and uncertainties detailed from time to time in the Company's interim or annual reports, prospectuses or press releases and other factors that are outside the Company's control. Any forward-looking statements made by or on behalf of the Company speak only as of the date they are made. The Company does not undertake to update forward-looking statements to reflect any changes in the Company's expectations with regard thereto or any changes in events, conditions or circumstances on which any such statement is based.

2021 EU submission for potential new global market leader

MOB-015 has demonstrated world-leading ability to kill nail fungus

Partnerships in place – potential milestones of USD 120m

On track for launch – capturing full value potential

- 76%¹ of patients became fungus free, in two phase 3-studies including 800+ patients
- Additional de-risked US Phase 3 study based on completed phase III studies to enable US approval and strengthen claims globally
- Targeting category leadership with USD 250-500m potential global product sales

EU

TAISHO PHARMACEUTICAL

Japan

Republic of Korea

Canada

- EU submission H2 2021
Product launch 2023
- Proven commercial track record from Kerasal Nail[®] – built SEK 440 million franchise with 30% market share in the US
- Commercialization process to be repeated for MOB-015

1) Other topical treatments demonstrating 30-54%.

100+ million patients need better treatment in EU/US only

10%

of the population suffer from nail fungus¹

\$2bn

global onychomycosis market²

7/10

doctors avoid prescribing terbinafine tablets due to patients' concerns for serious side effects, such as liver toxicity and drug-drug interactions³

1) PLoS Pathog. 2014 Jun; 10(6): e1004105.

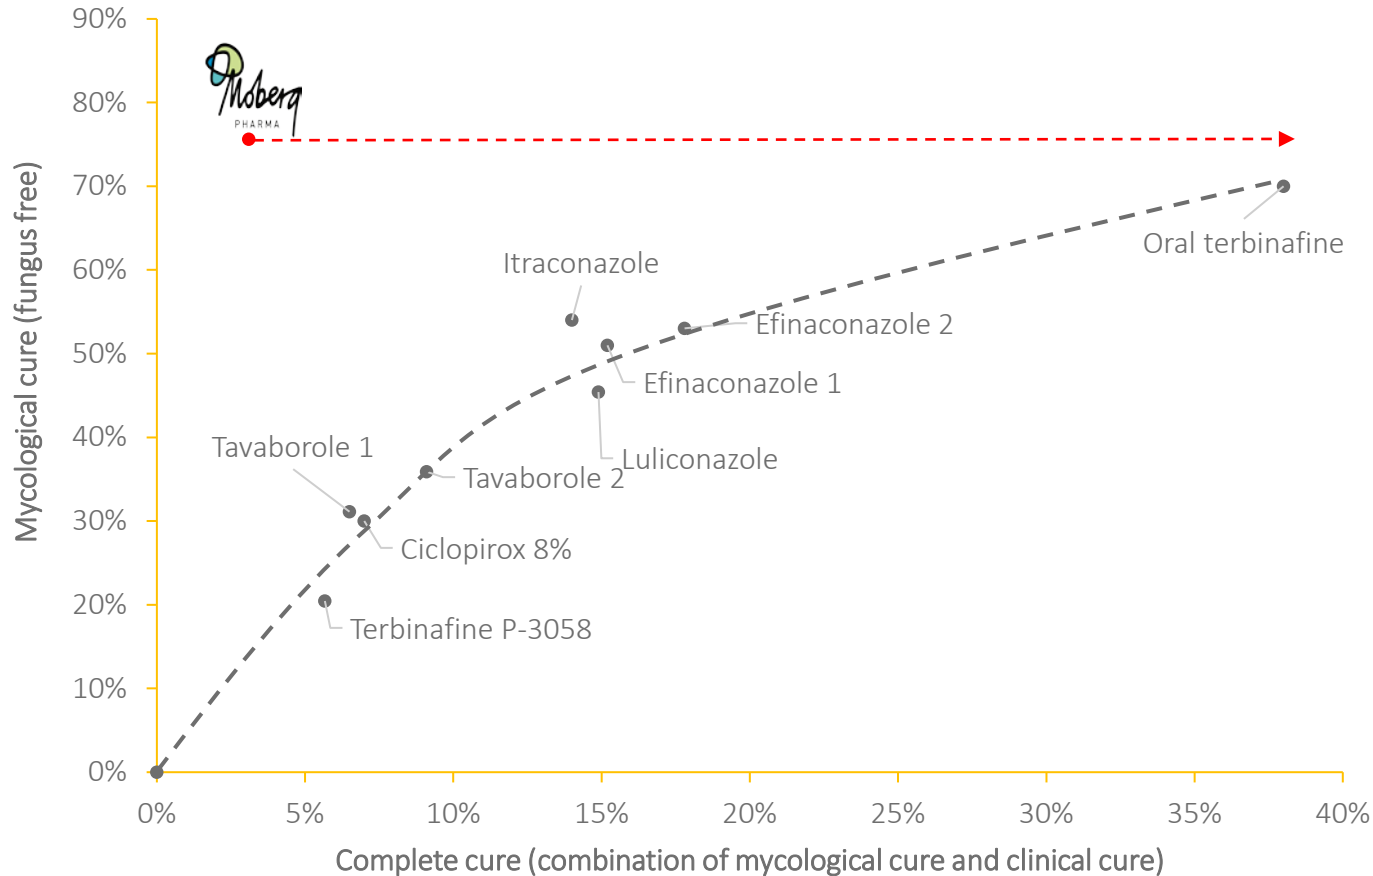

2) Moberg Pharma estimate, based on market data from Symphony Health Solutions (US Rx sales), Symphony IRI (US OTC sales), and market data from Moberg Pharma's partners.

3) LifeSci Physician Survey, April 4, 2017

Superior mycological cure – expecting to increase complete cure

Oral and topical treatments of nail fungus

Concentration of terbinafine 1000x in the nail and 40x in the nail bed when treated with MOB-015 compared to oral terbinafine.

Patients prefer an efficacious topical to oral terbinafine due to risk for severe side effects.

Additional Phase 3 study with attractive commercial impact

Shorter dosing regimen

- A regimen with daily dosing for 8-12 weeks followed by once weekly treatment, is highly attractive, and expected to maintain high mycological cure to deliver high complete cure
- This will significantly strengthen claims globally for MOB-015

Patient benefit

- Shorter daily dosing for only 8-12 weeks would be a **significant improvement for patients**, leading to improved convenience and compliance
- 75% of patients see improvements already at week 12¹

Competitive advantage

- Main topical competitors have 48 weeks daily treatment, but poor compliance. Average consumption is 12-16 weeks²
- MOB-015's dosing regimen will compare to oral treatment but without the safety issues of oral treatments

Key Opinion Leaders strongly support the concept

Dr Boni Elewski
Professor and Chair of the
Department of Dermatology
University of Alabama

"The high mycological cure rate demonstrated is very impressive and given the rapid onset of the antifungal effect, MOB-015 offers exciting benefits. I will definitely use it for my patients. A higher complete cure rate is likely to be achieved with a shorter treatment period and this would also be much more attractive to patients."

Dr Aditya Gupta
Professor, Department of Medicine
University of Toronto

*"I am a strong supporter of this concept. With an optimized dosing regimen this product has **great potential** and **may become the preferred therapeutic option**, not only for monotherapy, but also as maintenance therapy to reduce recurrence after oral treatment."*

Dr Jan Faergemann
Professor in Dermatology
Sahlgrenska Academy
University of Gothenburg

*"Based on decades of experience with terbinafine and the excipients used in MOB-015, I believe a shorter treatment period has the potential to provide higher complete cure rates. **Killing the fungus is the driver of also reaching complete cure.**"*

UNIVERSITY OF
GOTHENBURG

USD 250-500m potential global product sales for MOB-015

US
USD 150 - 300m

US Rx¹ potential:

USD 150 - 300m (400 - 600 thousand units à USD 375 - 500/unit after GTN discount i.e. pricing on par with branded competitors and a target market share of 8 - 12%)

Other Rx markets
USD 50 - 100m

Other Rx markets, e.g. Japan and Canada:

USD 50 - 100m (USD 40 - 100/unit ex factory and targeting a market share of 10 - 20%)

OTC markets
USD 50 - 100m

OTC markets in EU and RoW:

USD 50 - 100m (3.5 - 7 million units à EUR 15/unit ex factory)

On track to file for EU approval and launch

- Dialogue with EMA on pediatric plan driving H2 2021 submission timeline
 - Target to submit a full application
 - Opportunity to get data exclusivity for up to 10 years after market approval
 - Final decision is anticipated from the EMA's Paediatric Committee in September

- Progressing US development plan in parallel

Strong commercial partners in place

USD 200m+

EU OTC market for topical onychomycosis in 2017

- The world leader in OTC antifungal treatments with the brand Canesten
- Up to EUR 50 million in milestone payments with EUR 1.5 million upfront
- Royalties and supply fees for delivered products

USD 290m

Japanese market for branded drugs for onychomycosis in 2018

- Up to USD 50 million in milestone payments, with USD 5 million upfront
- Royalties and supply fees for delivered products

USD 58m

Canadian market for onychomycosis prescription drugs in 2017

- Up to USD 14.6 million in milestone payments, with USD 0.5 million upfront
- Royalties on future net sales in Canada

USD 40m

Korean market for topical drugs for onychomycosis

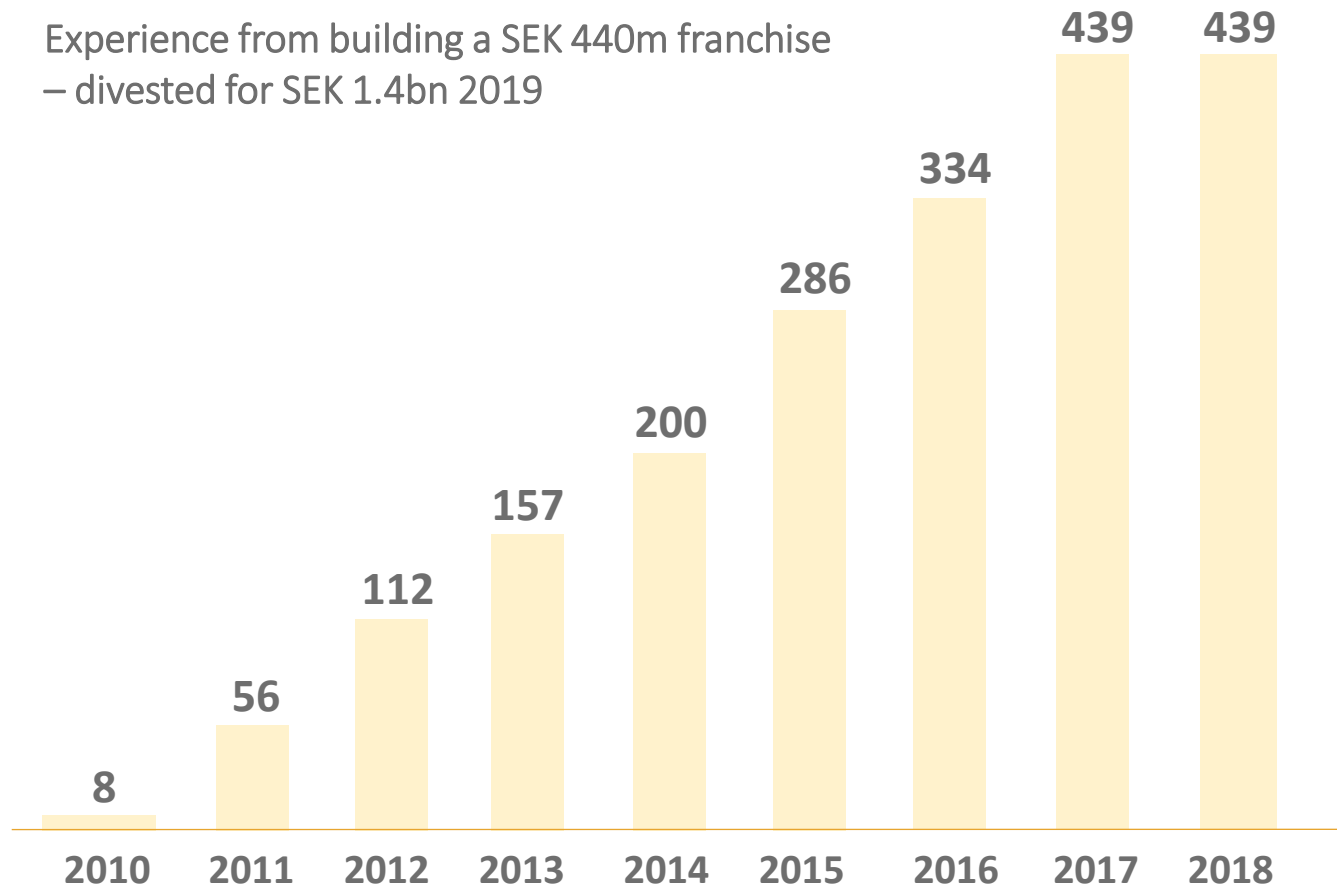

- Korean dermatology market leader, excellent coverage of dermatology clinics
- Distribution agreements with attractive margins

Excellent commercial track record from Kerasal Nail

Net Sales, SEKm

Experience from building a SEK 440m franchise
– divested for SEK 1.4bn 2019
